DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 17, 2006 has been entered.

Allowable Subject Matter

2. Claims 1, 3-6 and 8-16 are allowed.

The following is an examiner's statement of reasons for allowance: upon further consideration of the prior art of record, the Examiner has withdrawn her previous position that the prior art of record encompasses a three layer structure in which the third nonwoven layer has a non-circular cross-section. While the Braun reference implies having a multilayer laminate of more than two layers of noncircular fibers, it fails to teach the presently claimed construction that requires one trilobal outer layer in a three-layer laminate wherein the other outer layer and the intermediate layers are of noncircular fibers structures (that differ between the two layers). The structure described above is broadly claimed in claim 10 of the present invention; claim 1, further requires the intermediate layer to be of fiber with cross section of four lobes or more. Claims 11 and 16 represent more specific embodiments that require a three-layer structure with intermediate layer comprised of fibers having a cross section which defines four or more lobes, and the outer layers are comprised of fibers having a trilobal cross section.
